DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

RECOMMENDED APPLICATIONS		
CROP	PEST	DOSAGE
FIELD CROPS Field Corn Sweet Corn Popcorn Corn grown for seed or silage	Chinch bugs Corn rootworm larvae Mexican Northern Southern Western Cutworms Wireworms Seedcorn maggot Seedcorn beetle Whitegrubs	6.7 Ounces Per 1000 Feet of Row

REMARKS: BAND - Apply specified dosage at planting as a 7-inch band over the row behind the planter shoe and in front of the press wheel. Granules must be incorporated into the top one inch of soil using tines, chains, or other suitable equipment.

T-BAND - Apply specified dosage at planting as a T-Band over the row behind the planter shoe and in front of the press wheel. Incorporation into the soil surface may also be accomplished with a drag chain or other suitable equipment.

IN-FURROW - Apply specified dosage at planting directly into the seed furrow behind the planter shoe and in front of the press wheel.

A maximum of 7.3 pounds DEFCON ® 2.1% Granular Insecticide may be applied per acre per crop season.

Row Spacing (inches):	30	32	34	36	38	40
Pounds per Acre:	7.3	6.9	6.5	6.1	5.8	5.5

For no-till corn where runoff drains into adjacent or neighboring aquatic sites (lakes, reservoirs, rivers, permanent streams, marshes, estuaries, natural ponds, or ponds used for commercial fishing), apply DEFCON ® 2.1% Granular Insecticide as an in-furrow or T-band application only. For applications made within 20 yards of aquatic sites (lakes, reservoirs, rivers, permanent streams, marshes, estuaries, natural ponds, or ponds used for commercial fishing), apply as an in-furrow application only.

Cover or incorporate spills (including end row spillage).
