Soybeans: Apply REFLEX at or before the R-1 growth stage (one open flower at any node on the main stem) of the soybeans.

Idle Cropland: Apply as a direct spray to the witchweed plants before they bloom. Add nonionic surfactant containing at least 75% surface active agent at 0.25 to 0.5% (1/2 to 1 pint per 25 gallons) of the finished spray volume to improve contact activity.
