**Flint® Fungicide**
**EPA Reg. No. 264-777**
**Approval: December 23, 2003**
**Label Revisions: *Added use directions for Leafy Petiole Vegetables.***

## Supplemental Label

# Flint® Fungicide

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label and the product package label before using this product. This Supplemental Label must be in possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product label for Flint® Fungicide.

### USE DIRECTIONS FOR SPECIFIC CROPS

Flint® provides control or suppression of several important diseases of almonds, cucurbit vegetables, fruiting vegetables, grapes, hops, leafy petiole vegetables, pistachios, pome fruits, root vegetables (except radishes), stone fruits and tree nuts. When reference is made to disease suppression, suppression can mean either erratic control from good to fair, or consistent control at a level below that obtained with the best commercial disease control products.

<b>LEAFY PETIOLE VEGETABLES: Cardoon, Celery, Chinese celery, Celtuce, Florence fennel, Rhubarb, Swiss chard.</b>			
<b>Disease Control</b>	<b>Rate Oz/Acre</b>	<b>Application Timing</b>	<b>Notes</b>
Early Blight <i>(Cercospora apii)</i> Late blight <i>(Septoria apiicola)</i> Rust <i>(Puccinia spp., Uromyces spp.)</i>	2.0 – 3.0	Begin applications preventively and continue as needed on a 14-day interval.	Use the higher rates and shorter intervals when disease pressure is severe. A minimum spray volume of 30 gal/A is recommended.
<b>Restrictions:</b> Do not apply more than 12 oz of Flint® per acre per year. Do not apply Flint® within 7 days of harvest. Do not apply more than 4 applications of Flint® or other strobilurin fungicide per season. To limit the potential for resistance to develop, do not apply more than 3 sequential applications of Flint® or other strobilurin fungicide.
