# DRAFT #5 TO PFOA ECA PROCESS DRAFTING COMMITTEE

# ENFORCEABLE CONSENT AGREEMENT FOR THE LABORATORY-SCALE INCINERATION TESTING OF FLUOROPOLYMERS

# Docket No. OPPT - [YEAR] - [EDOCKET NO.]

### [DRAFT 1/13/04] [Month Year]

# NOTE TO DRAFTING COMMITTEE:

This 1/13/04 draft incorporates changes as discussed at the 1/6/04 meeting.

- 1) Red text indicates places where suggested revisions or **new** text has been inserted since the last discussions. Strikeout shows text to be deleted.
- 2) **\*\*\* Follow-on Discussion** indicates areas for further discussion. This includes original text, proposed changes, and, in some cases, alternative text.
- 3) **\*\*\* IMPASSE DISCUSSION POINT** Provides a summary of differing views, original text, proposed changes, and in some cases, alternative language.

Ь

#### I. INTRODUCTION

Under the authority of section 4 of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2603, and 40 CFR Part 790 of the Agency's implementing regulations, the United States Environmental Protection Agency (EPA) and Asahi Glass Fluoropolymers USA, Inc., Daikin America, Inc., Dyneon, LLC, and E.I. du Pont de Nemours and Company (hereinafter collectively "the Companies") enter into this enforceable consent agreement (ECA). This ECA will take effect on the date of publication of the notice in the <u>Federal Register</u> announcing the issuance of the testing consent order (Order) that incorporates this ECA.

9 10

1

2 3

4

5

6 7

8

11 On April 16, 2003, EPA initiated a public process to negotiate enforceable consent agreements (ECAs) under section 4 of TSCA concerning perfluorooctanoic acid (PFOA) and fluorinated telomers 12 to develop environmental fate and transport information, as well as relevant information to enhance 13 understanding of the sources of PFOA in the environment and the pathways by which human exposure 14 15 to PFOA is occurring (68 FR 18626; April 16, 2003). The goal of the ECAs resulting from these public discussions is to develop data relevant to identifying the pathway or pathways that result in 16 exposures to PFOA by air, water, soil, or food; and to characterize how PFOA gets into those 17 18 pathways (including the products or processes that are responsible for the presence of PFOA in the environment). EPA anticipates that the data to be developed under such ECAs will be beyond or 19 20 supplemental to that of ongoing testing efforts described under industry letters of intent (LOIs) (Refs 1-21 4). [OPPT-2003-0012-0007,0012,0013,0016]

22 23

24 25

26

27

28

29 30 In preparation for the June 6, 2003, public meeting, EPA developed a preliminary framework document outlining data needs that the Agency deemed appropriate to address the outstanding PFOA source and exposure questions identified in the *Federal Register* notice of April 16, 2003 (Ref 5)[**OPPT-2003-0012-0056**]. The intent of EPA's preliminary framework document was to serve as a discussion guide for the June 6, 2003, public meeting and to aid in distinguishing between outstanding EPA data needs and industry LOI commitments. The preliminary framework document was not a predetermined list of information needs defining the outcome of the ECA process.

This ECA provides for a laboratory-scale incineration testing program of fluoropolymers, which 31 32 is one of the data needs identified in EPA's preliminary framework document for PFOA. On June 6, 2003, the PFOA Plenary Group (consisting of EPA and all interested parties) acknowledged such a 33 testing program as an opportunity for ECA development and tasked the Fluoropolymer Technical 34 Workgroup to work out the details that could be incorporated into an ECA between test sponsors and 35 EPA. On July 9, 2003, the Fluoropolymer Technical Workgroup received proposals from the 36 Companies and EPA for incineration testing of fluoropolymers. Details of this testing program were 37 developed by members of the Fluoropolymer Incineration Subgroup of the Fluoropolymer Technical 38

P

Workgroup during subsequent meetings. On [Month/Date], 2003, the Fluoropolymer Technical Workgroup acknowledged that this testing program had sufficient merit for consideration by the Plenary Group. On [Month/Date], 2003, the Plenary Group discussed the merit of this testing program and recommended that EPA consider entering into an ECA with test sponsors. The official record for the development of this ECA, including the public version, is established under EPA docket control number [OPPT-2003-0012]. The procedures for ECA negotiations are described at 40 CFR 790.22(b). The official record for the testing conducted under this ECA is Docket No. [OPPT-YEAR-?? XXXX?]

### **II. TEST SUBSTANCES**

The chemicals subject to this ECA are the fluoropolymers listed in Appendix A.1. For the purposes of testing under this ECA the chemicals listed in Appendix A.1<sup>1</sup> will be combined formulated to form four composites (see Appendix A.3 and A.4). These four composites are the subject test substances under this ECA These composites are representative of fluoropolymer products manufactured by the Companies that are currently available in the marketplace. The Companies will provide the fluoropolymers specified in Appendix A.1 for incorporation into the composites that will be tested under this ECA.<sup>2</sup> Criteria for the selection of each composite to be tested under this ECA are described in Appendix A.2 of this ECA<sup>1</sup>. The component composition of each composite is described in Appendix A.3 of this ECA<sup>1</sup>. The four composites to be tested are defined for purposes of this ECA as:

| (A) | Dry Non-Melt PTFE Resin Composite: Ethene, tetrafluoro-, |
|-----|--|
|     | homopolymer, CAS No. 9002-84-0,                          |
|     |  |

| 26 | (B) | Dry Melt Fluoropolymer Resin Composite: (containing: 1-Propene,    |
|----|-----|--|
| 27 |     | 1,1,2,3,3,3-hexafluoro-, polymer with tetrafluoroethene), CAS No.  |
| 28 |     | 25067-11-2; Propane, 1,1,1,2,2,3,3-heptafluoro-3-                  |
| 29 |     | [(trifluoroethenyl)oxy]-, polymer with tetrafluoroethene, CAS No.  |
| 30 |     | 26655-00-5; Ethene, tetrafluoro-, polymer with                     |
| 31 |     | trifluoro(pentafluoroethoxy)ethene, CAS No. 31784-04-0; 1-Propene, |

<sup>&</sup>lt;sup>1</sup> There is a Public and CBI version of Appendices A.1, A.2, A.3, and A.4 [To be determined] because some of the Companies have asserted that details describing one or more of the chemicals subject to this ECA are entitled to treatment as TSCA confidential business information (CBI) (see Part XV of this ECA regarding confidentiality of information).

<sup>&</sup>lt;sup>2</sup> See the Tables in Part XXIV. of this ECA for the chemicals to be supplied by each Company.

4

The Companies are bound by the terms of this ECA as specified below.

**OBLIGATION OF SIGNATORY COMPANIES** 

5 B. Each Company shall be responsible for supplying the test substance(s) it manufacturers for incorporation into the composite(s) to be tested under this ECA, as specified on each Company 6 7 signature page and in Appendix A.3. The schedule for the testing program includes the deadline date 8 by which the Companies must submit their contribution(s) to the facility(ies) that will be assembling the 9 composites to be tested under this ECA. Any Company failing to comply with this ECA requirement will be in violation of this ECA as described in 40 CFR 790.65 (see part XII of this ECA). In the event 10 11 that one or more of the Companies are in violation as described above then the remaining Companies 12 will inform EPA of the problem and request an EPA determination on how to proceed with the testing 13 program described under this ECA. Each Company required to contribute to a particular composite is obligated to complete the testing required by this ECA for that composite. A Company shall not be 14 15 responsible for any failure to perform its obligation under this ECA that is caused by circumstances beyond their its control, that the Company could not have prevented through the exercise of due 16 17 diligence. Under such circumstances the Company will consult with EPA to reach agreement on what 18 modifications, if any, are needed in the test plan or scope of testing (see Part X of this ECA regarding 19 modification to this ECA as contained in 40 CFR 790.68).

20 21

22

23

24 25 C. The Companies recognize that to implement this ECA, EPA will issue an Order under section 4 of TSCA that incorporates the terms of this ECA (see Appendix G). The Companies agree that all terms of this ECA will take effect on the date of publication of the notice in the <u>Federal Register</u> announcing the issuance of the Order that incorporates this ECA, and all time periods that begin on the effective date, will be treated as beginning on that publication date.

### IV. PRINCIPAL TEST SPONSOR

The Companies have identified the Fluoropolymer Manufacturers Group (FMG), to communicate with EPA about schedules, study plans, protocols, test standards, and other aspects of the testing program. EPA and the Companies agree that FMG has no legal responsibility for complying with this ECA. Responsibility for complying with the ECA rests at all times with the Companies.

# V. PURPOSE OF THE TESTING PROGRAM

1 The purpose of the testing program specified by this ECA is to assess the potential for waste 2 incineration of fluoropolymers (see Part II and Appendix A.1 of this ECA) to emit PFOA, based on 3 quantitative determination of potential exhaust gas levels of PFOA that may emanate from laboratory-4 scale combustion testing under conditions representative of typical municipal waste combustor 5 operations in the United States.

7 EPA believes that these incineration studies of fluoropolymers will develop data needed by the 8 Agency to determine whether municipal and/or medical waste incineration of fluoropolymers is a 9 potential source of PFOA that may contribute as a pathway to environmental and human exposures. The data may also be used to inform screening level human and environmental exposure assessments. 10 In addition, the data may also be used by other Federal agencies (e.g., the Agency for Toxic 11 Substances and Disease Registry (ATSDR), the National Institute for Occupational Safety and Health 12 13 (NIOSH), the Occupational Safety and Health Administration (OSHA), and the Consumer Product 14 Safety Commission (CPSC), the Food and Drug Administration (FDA)) in assessing chemical risks and 15 in taking appropriate actions within their programs. It is intended that the data generated under this ECA will identify whether the incineration of fluoropolymers contributes to the sources and pathways of 16 17 environmental and human exposure to PFOA.

25 26

19 20

6

# VI. SCOPE OF THE PROGRAM

The scope of this testing program is described in Paragraphs VII and VIII below and will consist of the testing listed in Table 1 in accordance with the test standards specified in Table 1 and described in Appendix B.1 and C.1 - C2.5 as annotated by Appendix D.1- D.4 to this ECA ("Test Standards") and submitting the reports and documents specified in Table 1 in accordance with the deadlines set forth in Table 1 and described in Appendices C.1 - C.2.5 and E.1- E.2.

- 27 28
- 29 30

33

# VII. DESCRIPTION OF THE TESTING PROGRAM

The program has two segments as follows: Phase I PFOA Transport Testing and Phase II
 Fluoropolymer Incineration Testing.

A. <u>Phase I PFOA Transport Testing:</u> Phase I will consist of quantitative transport efficiency testing for PFOA. Phase I testing for PFOA transport efficiency is specified in the Phase I PFOA Transport Testing segment of Table 1 and described in Appendix C.1 as annotated by Appendix D.1 and D.2. At the conclusion of Phase I testing, the Companies, will provide EPA with a letter report summarizing the results. In the event that the transport efficiency of PFOA or total fluorine

(as determined by the formulas in Appendix C.1) is equal to or greater than 70%, testing will proceed
to Phase II Fluoropolymer Incineration Testing. In the event the transport efficiency of PFOA or total
fluorine (as determined by the formulas in Appendix C.1) is less than 70%, the Companies will initiate a
technical consultation with EPA (see Part VII. B. and Part VIII of this ECA).

B. <u>Phase II Fluoropolymer Incineration Testing</u>: This testing, specified in the Phase II
 Fluoropolymer Incineration Testing segment of Table 1 and described in Appendix C.2.1 - C.2.6 as annotated by Appendices B.1, D.1, D.2, and E.2; and will include the following for each fluoropolymer composite to be tested under this ECA: 1) elemental analysis, 2) combustion stoichiometry, 3) thermogravimetric analysis, 4) laboratory-scale combustion testing, and, 5) if required under this ECA,<sup>3</sup> release assessment reporting.

# 

### VIII. PHASE I TECHNICAL CONSULTATION

A. Following completion of Phase I and prior to the initiation of Phase II, the Companies will submit a letter report to EPA with the results for the recovery across the laboratory-scale thermal reactor system, as determined from Phase I testing.

B. If the recovery for either PFOA or Total Fluorine (as determined by the formulas in Appendix C.1) is greater than or equal to 70%, the Companies will proceed to Phase II testing.

C. If the recovery for both PFOA and Total Fluorine (as determined by the formulas in Appendix C.1) is less than 70%, a Technical consultation will be held between the Companies and EPA. The objective of the Technical Consultation will be to reach agreement on how to proceed. The technical consultation will review the outcomes of the Phase I PFOA Transport Efficiency Testing, discuss the feasibility of proceeding with Phase II Testing as described in this ECA, and discuss whether additional modifications are needed to the test standards and/or protocols described in Appendices B, C and D for Phase I PFOA Transport Testing and/or Phase II Fluoropolymer Incineration Testing. Specifically, the technical consultation will address: (1) whether the data from the

<sup>&</sup>lt;sup>3</sup> In the event that Phase II Fluoropolymer Incineration Testing identifies measurable levels of PFOA (where measurable PFOA is defined to be at or above the limit of quantitation (LOQ) as defined in Appendix D.3) resulting from the incineration testing for any or all of the fluoropolymer composites tested under this ECA (see Part II and Appendix A.1 - A.4 to this ECA), the Companies will prepare a release assessment report (see Table 1 and Appendix E.2 to this ECA) to place in perspective the relevance of such measurable levels in the laboratory-scale incineration testing results with respect to full-scale municipal and/or medical waste incinerator operations in the United States.

Phase I PFOA Transport Testing segment provide a sufficient basis for conducting the laboratory-scale incineration testing specified in the Phase II Fluoropolymer Incineration Testing segment; (2) the nature and scope of any additional Phase I work that may be required prior to the commencement of Phase II Testing and reporting (e.g., modifications to the Advanced Thermal Reactor System) as described in Part VII. B. of this ECA), and/or (3) the nature and scope of modifications to the protocols and test standards for Phase I and/or Phase II testing, or the identification of additional testing, that may be needed to complete the testing under this ECA.

Possible outcomes of the Technical Consultation include, but are not limited to, the following:

1. An agreement to conduct additional Phase I testing, and the schedule and standards for such testing, to inform whether and under what conditions to conduct Phase II testing.

# 2. An agreement to proceed into Phase II testing with or without agreed-to modifications to plans, test standards and schedules for Phase II testing.

3. An agreement to conduct such other testing, and the schedule and standards for such testing, in Phase II that the Companies and EPA agree may be appropriate, in light of Phase I results, to assist in determining the potential for release of PFOA from fluoropolymers during incineration.

4. No agreement on a path forward, in which case the Companies' obligations to conduct testing or reporting beyond Phase I PFOA Transport Testing as described in this ECA are terminated.

30 D. EPA shall place in the record for this action docket (OPPT-YEAR-??XXXX??) a summary of any Technical Consultation that is held under this paragraph. In the event modifications to 31 the scope of the testing program are agreed to, EPA and the Companies will revise this ECA, as well 32 as Table 1 and the Appendices, as appropriate. If EPA determines that any changes to the scope of 33 34 the testing program are significant, an opportunity for public participation will be provided. EPA will 35 publish a request for public comments and/or announce a public meeting in the Federal Register. Following the comment period, EPA will place in the record for this action a summary of the Technical 36 Consultation, a copy of comments received, a copy of the letter sent to the Companies explaining the 37

decisions and outcomes of the technical consultation, and a copy of the modified ECA. This process is 1 2 in lieu of the modification procedures described in 40 CFR 790.68 (see Part X of this ECA).

# IX. STANDARDS FOR CONDUCTING TESTING

Testing for the laboratory-scale incineration of the four fluoropolymer test substance A. composites described in Part II of this ECA and containing the fluoropolymers described in Part II and listed in Appendix A.1 of this ECA must be conducted in accordance with the Test Standards listed in Table 1 and described in Appendices B.1 and C.1 - C.2 as annotated in Appendices D.1-D.3 to this 10 ECA. Certain provisions of these Test Standards are considered to be mandatory and are referred to as "requirements." These requirements are identified by the use of the word "shall" in the text of the Test Standard. For the purpose of this ECA, the words "will" and "must," if they appear in the Test Standards, are considered equivalent to the word "shall" and therefore delineate a test requirement to be followed or met.

15 16

14

Provisions that are not mandatory, and are therefore only recommended, are identified by the 17 use of "should" statements. In the event such "should" provisions are not followed, the Companies will 18 19 not be deemed by EPA to be in violation of this ECA and will not be subject to penalties or other 20 enforcement actions, as described in Part XII. of this ECA. However, in such cases, EPA will use its 21 professional judgement to determine the scientific adequacy of the test results and any repeat testing that is determined by EPA to be necessary will be required either under a separate ECA or pursuant to 22 a rule promulgated under section 4(a) of TSCA, 15 U.S.C. 2603(a). 23

24 25

26

27

B. The Companies and EPA will consult in a good faith effort to consider the need for Test Standard modifications if either EPA or the Companies desire such modifications. Modifications to this ECA will be governed by 40 CFR 790.68 (see Part XI. of this ECA).

#### 28 \*\*\* IMPASSE DISCUSSION POINT: 29

The FMG will provide a table demonstrating how the QAPjP will address the 30 **SUMMARY:** 31 GLPS requirements under 40 CFR part 792. FMG indicates that the University of Dayton laboratory can not comply with GLPS requirements for testing under this ECA. In addition, 32 FMG expresses concern about duplication between QAPjP and study plan requirements. EPA 33 maintains that 1) study plan(s) are required, 2) all studies must be conducted in accordance 34 with GLP and 3) a separate QAPjP must be submitted. | 35

36

{original text} 37

C. All testing required by this ECA must be conducted in accordance with the EPA Good Laboratory Practice Standards (GLPS) found at 40 CFR part 792.

#### {12/22/03 Revised EPA placeholder text with supplemental text in red}

#### {11/24/03 FMG proposed revisions}

C. All testing required by this ECA must be conducted in accordance with the EPA Good Laboratory Practice Standards (GLPS) found at 40 CFR part 792. a Quality Assurance Project Plan prepared in accordance with Appendix YYY.

#### X. STUDY PLANS

The Companies will submit a study plan to EPA for each test conducted pursuant to this ECA prior to the initiation of testing in accordance with 40 CFR 790.62. (For this ECA, EPA will not require the plans under this Part of the ECA to be submitted "no later than 45 days prior to the initiation of testing," as specified at 40 CFR 790.62(a)). The content of the study plan plans submitted to EPA will comply with 40 CFR 790.62(b). The A study plan may cross reference those specific portions of Table 1 and/or the Appendices. This ECA and/or its appendices satisfy the requirements of 40 CFR 790.62(b)(2). (9), and (10). A study plan may cross reference the applicable provisions of the ECA and/or its appendices to satisfy these requirements. Also pursuant to Part IX. (C) of this ECA, the Companies must submit - Quality

Assurance Project Plan Plan(s) (QAPjP) prepared in accordance with Appendix F EPA guidance.<sup>4</sup> Modifications to the study plan(s) under this part of the ECA will be governed by the procedures of 40 CFR 790.62(c) except that the 15 day time periods in 40 CFR 790.62(c) (2) and (3) will be 45 day time periods. All study plan(s) will become part of the official record (Docket Control Number **JOPPT-YEAR-?? XXXX ??]**).

#### XI. MODIFICATIONS TO THIS ENFORCEABLE CONSENT AGREEMENT

<sup>4</sup> Guidance for developing Quality Assurance Project Plans can be found in the EPA document EPA QA/G-5: *Guidance for Quality Assurance Project Plans*, prepared by: Office of Environmental Information, EPA, December 2002. This is also available from the EPA website at <u>http://epa.GOV/Quality/qs-docs</u>.

7 8 A. A paper copy of a document shall be deemed submitted when it is either postmaked or placed in the hands of a commercial courier service for delivery to EPA at the appropriate address specified above. Hand-delivered documents are deemed submitted upon receipt. Electronically transmitted documents are deemed delivered upon transmission.

In accordance with 40 CFR 790.62 (d), the Companies will submit interim progress reports to EPA informing the Agency of any proposed changes in standards for the development of data, study plans, or test schedules, and communicating with the Agency about laboratory inspections and other matters affecting the progress of testing. The schedule for interim progress reports is specified in Table 1 of this ECA. The information required in interim progress reports is specified in Appendix E.1.

10 11

9

B. All documents submitted to EPA under this ECA must be identified by the Docket ID 12 Number (OPPT- Year - ?? XXXX ??) and the name: ECA on Laboratory-Scale Incineration Testing 13 of Fluoropolymers. Submissions made by mail should be sent to: Document Control Office (7407M), 14 Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 15 Pennsylvania Avenue, NW, Washington, DC 20460-0001. Submissions made by hand delivery or 16 17 courier should be delivered to: OPPT Document Control Office (DCO) in the EPA East Building, Room 6428, 1201 Constitution Avenue, NW, Washington, DC and marked Attention: Docket ID 18 Number **OPPT- Year**-??XXXX??. The DCO is open from 8 a.m. to 4 p.m., Monday through 19 Friday, excluding legal holidays. The telephone number for the DCO is (202) 564-8930. 20

# ?? Do we need additional text regarding non-CBI electronic submissions??

C. The Companies must submit six (6) paper copies of each version (Public and CBI) for all reports described in Table 1 and Part VI A. and B. of this ECA. In addition, an electronic file of all documents submitted under this ECA (marked as CBI where appropriate and in text-searchable, PDF format) will be provided to EPA.

D. Any document submitted to EPA that contains data or information for which a Signatory Company makes a claim of confidentiality (see Part XV of this ECA), must be submitted as two separate versions. One version must be complete, with the information being claimed as confidential marked in the manner described under 40 CFR 790.7. The other, public version must be identical in all respects except that all of the information claimed as confidential shall be redacted. EPA will place the public version in the Agency's docket. The complete version will be treated in accordance with EPA confidentiality regulations in 40 CFR part 2 and 40 CFR 790.7.

36

Data or other information that are considered to be CBI must not be submitted through EPA's
 electronic public docket or by e-mail. Any part or all of data or other information claimed as CBI must

| 1<br>2<br>3<br>4<br>5              | be so marked. If the CBI submission is on diskette or CD ROM, mark the outside of the diskette or CD ROM as CBI and then identify electronically within the diskette or CD ROM the specific information that is CBI. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2 (see Part XV of this ECA).  |
|------------------------------------|--|
| 6<br>7<br>8<br>9<br>10<br>11<br>12 | Any claims of confidentiality for information submitted under this ECA will be made under the terms of 40 CFR 790.7. If no claim of confidentiality is made by the submitter of the information at the time of submission, the information will be deemed by EPA, in accordance with 40 CFR 790.7, to be public, and may be made available to the public without further notice to the submitter. Information claimed as confidential will be treated in accordance with the procedures in 40 CFR part 2 established pursuant to section 14 of TSCA, 15 U.S.C. 2613. |
| 13                                 | XV. PUBLICATION AND DISCLOSURE OF TEST RESULTS   |

| 16                                 | *** Follow-on DISCUSSION POINT   |
| 17                                 | [Summary - FMG proposed 11/24/03 additional text to clarify conditions under which EPA can   |
| 18                                 | share a CBI Document with another government agency. EPA struck this addition on   |
| 19                                 | 12/22/03 citing laws governing such distribution adequately addressed FMG concerns. During   |
| 20                                 | further discussion, it became clear that additional clarification could be provided to meet  |
| 21                                 | FMG's needs. Excerpt text from the OPPTS CBI manual was provided to FMG and  |
| 22                                 | alternative language is suggested in red.]   |
| 23                                 |  |
| 24                                 | All results of testing conducted pursuant to this ECA will be announced to the public by EPA in  |
| 25                                 | accordance with the procedures specified in section 4(d) of TSCA, 15 U.S.C. 2603(d). Disclosure  |
| 26                                 | by EPA of data generated by such testing to the public or other government agencies will be governed   |
| 27                                 | by section 14(b) of TSCA, 15 U.S.C. 2613(b), and 40 CFR part 2. The CBI version of a document  |
| 28                                 | will only be provided to another U.S. government organization in compliance with the procedures  |
| 29                                 | described in the OPPTS ITSCA CBI Procedure Manual.   |
| 30                                 |  |
| 31                                 |  |
| 32                                 | {FMG 11/24/03 proposed additional text / struck by EPA 12/22/03}   |
| 33                                 | The CBI version of a document will not be provided to another government agency unless that agency   |
| 34<br>25                           | has certified that it affords equivalent protection.   |
| 35<br>36                           |  |
| 37                                 | XVI. OTHER RESPONSIBILITIES OF THE COMPANIES   |
| 38                                 | AVI. <u>OTHER REDI ONDERTIES OF THE COMPANYES</u>  |
| 20                                 |  |

The Companies will comply with the notification requirements of section 12(b)(1) of A. TSCA, 15 U.S.C. 2611(b)(1), and 40 CFR part 707, subpart D, if they export or intend to export any of the fluoropolymer chemicals listed in Appendix A.1 to this ECA ethene, tetrafluoro-homopolymer (PTFE) (CAS No. 90002-84-0) or any of the composite test substances described in Part II and Appendix A.3 of this ECA. Any other person who exports or intends to export any of the fluoropolymer chemicals listed in Appendix A.1 to this ECA ethene, tetrafluoro-homopolymer (PTFE) (CAS No. 90002-84-0) or any of the composite test substances described in Part II and Appendix A.3 of this ECA is subject to the above cited export notification requirements If any of the fluoropolymer chemicals listed in Appendix A.1 to this ECA become В. subject to a rule promulgated under TSCA section 5(a)(2), 15 U.S.C. 2604(a)(2), governing significant new uses of any of the fluoropolymer chemicals listed in Appendix A.1 to this ECA, then the 

Companies will be subject to the data submission requirements imposed by section 5(b)(1)(A) of TSCA, 15 U.S.C. 2604(b)(1)(A), as if the testing under this ECA had been required by a TSCA section 4 test rule.

#### XVII. SEVERABILITY OF ENFORCEABLE CONSENT AGREEMENT PROVISIONS

In the event that one or more provisions of this ECA are determined by a court decision to be unenforceable, the remaining provisions of this ECA will not be presumed to be valid, and EPA will either initiate a rulemaking proceeding to require testing or publish in the <u>Federal Register</u> the reasons for not initiating such a proceeding.

#### XVIII. FINAL AGENCY ACTION

For purposes of 5 U.S.C. 704, publication of the FR notice announcing the issuance of the Order incorporating this ECA constitutes final agency action.

#### XIX. <u>PUBLIC RECORD</u>

EPA has established a public record which will contain this ECA, the Order that incorporates this ECA, the <u>Federal Register</u> notice announcing issuance of the Order incorporating this ECA, and any and all relevant information, subject to the confidentiality provisions of section 14(b) of TSCA and 40 CFR part 2. The official record for this ECA, including the public version, which does not include

محجج متتبط فرحر

any information claimed as CBI, has been established under Docket Control Number [OPPT-YEAR-?? XXXX ??].

# XX. <u>EFFECTIVENESS</u>

This ECA may be signed in separate counterparts. This ECA will not be effective unless signed by each of the Companies and by EPA. This ECA will take effect on the date of publication of the <u>Federal Register</u> notice announcing the issuance of the Order that incorporates this ECA.

# XXI. <u>RIGHTS OF THE COMPANIES</u>

By signing this ECA, the Companies waive their right to challenge EPA's authority to assess penalties for violations of the terms of this ECA. This waiver does not affect any other rights that the Companies may have under TSCA, including the right to dispute the amount of any penalty or to dispute factually whether a violation of the terms of this ECA has occurred, or to seek judicial review of any rule that may be adopted by EPA that imposes requirements to test any of the fluoropolymer chemicals listed in Appendix A.1 to this ECA.

By signing this ECA, the Companies are not admitting that the requirements of TSCA Section 4 have been satisfied for promulgating a test rule to generate the data required by this ECA. {Note: This block of text has been moved to Part XXII, see below}

# XXII. RESERVATION OF RIGHTS BY COMPANIES

| 1  | By signing this ECA, the Companies are not admitting that the requirements of TSCA Section 4         |
|----|--|
| 2  | have been satisfied for promulgating a test rule to generate the data required by this ECA.          |
| 3  |  |
| 4  | The Companies contend that the documents generated for the incineration testing program              |
| 5  | under this ECA are protected from public disclosure under 5 U.S.C. section 552(b)(4) and 15 U.S.C.   |
| 6  | section 2613(a) and do not constitute studies subject to disclosure under 15 U.S.C. section 2613(b). |
| 7  | Accordingly, the public information disclosure provisions of this ECA are, in the view of the        |
| 8  | Companies, a waiver of legal rights.   |
| 9  |  |
| 10 |  |
| 11 |  |

DRAFT DOCUMENT - DO NOT CITE OR QUOTE - January 13, 2004

1 2

1 2 Table 1 REQUIRED TESTING, TEST STANDARDS, REPORTING AND OTHER 3 **REOUIREMENTS FOR THE LABORATORY-SCALE INCINERATION TESTING OF** 4 LUOROPOLYMERS Phase I **Deadline for Final** 5 6 **PFOA Transport Testing Test Standard** Report (Months)<sup>1</sup> 7 8 Study Plan(s) 40 CFR 790.62 (b) **?TBD ?** 9 **OAPiP** submission see Guidance Manual 10 **?TBD ?** 11 12 Quantitative PFOA transport See appendix C.1 as annotated in **?TBD** "4" ?<sup>3</sup> 13 analysis<sup>2</sup> appendix D.?)

As described in Part VII. A. of this ECA, at the conclusion of Phase I PFOA transport efficiency testing, and prior to initiation of Phase II, the Companies, will provide a letter/report to EPA summarizing the results of Phase I testing. In the event that the transport efficiency of PFOA or of total fluorine (as determined by the formulas in Appendix C.1) is greater than or equal to 70% then testing will proceed to Phase II Incineration Testing. In the event that the transport efficiency of PFOA or of total fluorine (as determined by the formulas in Appendix C.1) is less then 70% then the Companies will initiate a Technical Consultation with EPA to determine under what conditions Phase II testing can proceed. The outcomes of the Technical Consultation are described in Part VIII of this ECA.

<sup>3</sup> In the event that the transport efficiency of PFOA or of total fluorine (as determined by the formulas in Appendix C.1) is less than 70% and the Technical Consultation concludes that testing can not proceed to Phase II, then the Companies will submit a complete report for Phase I testing within 60 days following notification of the Technical Consultation outcome. In the event that the outcome of the Technical Consultation indicates that testing can proceed to Phase II Testing then the final report for Phase I will be incorporated into the final report for Phase II Testing.

<sup>&</sup>lt;sup>1</sup> Number of months after the effective date of the Order that incorporates this ECA when final report is due. Interim status reports, describing the status of all testing to be performed under this ECA, must be submitted by the Companies, through the FMG, to EPA every 6 months beginning six months from the effective date of this ECA until the end of the ECA testing program (see Part XIV. of this ECA).

#### **APPENDIX A.1**

#### LIST OF CHEMICALS SUBJECT TO THIS ECA1

The following table lists the thirteen fluoropolymer chemicals that are the subject to this ECA.

The identities of the fluoropolymers subject to this ECA were provided to EPA as support documentation of the Companies' LOI commitments. Some of this documentation, including certain aspects related to the identity of the test substance as described in Part II of this ECA and the table below, may contain Confidential Business Information (CBI). In such instances EPA creates a comprehensive database for evaluation and comparison, and, when possible, provides a public version sanitized of CBI.

Subsequent analysis of the list of fluoropolymers received by EPA supported the conclusion that the individual chemicals listed below are representative of all known fluoropolymer chemicals and the basic chemistries are represented by the four composite test substances that are subject to testing under this ECA (i.e., dry melt fluoropolymer resin, dry non-melt PTFE homopolymer resin/gum, dry non-melt fluoroelastomer resin/gum, aqueous fluoropolymer dispersions) (see ECA Appendix A.2 and A.3). The fluoropolymer structure is predominantly -(CF2)x- which is a potential source of PFOA. For all fluoropolymer products used in commerce, the -(CF2)- moiety is common to all polymers and the composites to be tested under this ECA testing program (see Appendix A.2-A.4) are representative of the individual component and non-component fluorochemicals. 

×

| No. | FLUC<br>CASNo. | DROPOLYMERS SUBJECT TO THIS ECA<br>Chemical Name   |
