JUL 15 2005

Dear Mr. Houtman:

Subject: Add Use in Food Handling Facilities
 ProFume Gas Fumigant
 EPA Registration No. 62719-376
 Your Submission Dated March 28, 2003

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following conditions:

- 1) Within two (2) years of the date of this letter, a study containing representative residue data must be submitted to reflect total post-treatment fluoride residues. The data must be of sufficient quantity and scope to allow re-evaluation of all tolerances, and should focus on agricultural commodities rather than finished foods. Prior to initiating this study, and within sixty (60) days of the date of this letter, a protocol must be submitted to reflect the proposed study outline. Within this protocol, a validation method for the data must be specified.
- 2) Changes to the applicator's manual, which is considered a component of the product labeling for this product, must be made as follows:
 - a) Ensure that the page numbers in the Table of Contents are correct.
 - b) On page 9, the reference to "Milk" present in the section for Commodities That Can Be Fumigated must be revised to read "Milk, powdered". In addition, correct the typographical error in this section so that "Whear milled byproducts" is revised to read "Wheat milled byproducts".
 - c) On page 26, within the section for Flames or Heating Elements, replace the term "SO₂" with the words "sulfur dioxide". In addition, replace the term "HF" with the words "hydrofluoric acid".
