CHIPCO TopChoice is to control imported fire ants in turfgrass and landscape beds. In addition, mole crickets, fleas, ticks, and nuisance ants are controlled for a limited time by the fire ant treatment.

FIFRA regulated use only.

SECTION 3. HAZARDS IDENTIFICATION

NOTE: Please refer to Section 11 for detailed toxicological information.

Emergency Overview

HAZARD TO HUMANS AND DOMESTIC ANIMALS
Harmful if absorbed through skin. Causes eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.

Physical State
granular solid

Odor
odorless.

Appearance
grey

Immediate Effects

Eye
Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

Skin
Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. May produce symptoms similar to those from ingestion.

Ingestion
Harmful if swallowed. Wash thoroughly with soap and water after handling. May cause shortness of breath, involuntary shaking, convulsions, excitement.

Inhalation
Harmful if inhaled. Avoid breathing in dust. May produce symptoms similar to those from ingestion. Remove contaminated clothing and wash clothing before reuse. May cause shortness of breath, excitement, involuntary shaking, convulsions, irritability.

Chronic or Delayed Long-Term
This product does not contain any ingredient designated by IARC, NTP, ACGIH or OSHA as probable or suspected human carcinogens.

Medical Conditions Aggravated by Exposure
Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema or bronchitis. Skin contact may aggravate existing skin disease.

Signs and Symptoms
In severe cases of overexposure by oral ingestion, lethargy, muscle tremors, and, in extreme cases, possibly convulsions, may occur.

SECTION 4. FIRST AID MEASURES

Eye
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Skin
Take off contaminated clothing. Rinse skin immediately with plenty of water for
15-20 minutes. Call a poison control center or doctor for treatment advice.

**Ingestion**

Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**Inhalation**

Remove victim from immediate source of exposure and assure that the victim is breathing. If breathing is difficult, administer oxygen, if available. If victim is not breathing, administer CPR (cardio-pulmonary resuscitation). Seek medical attention.

**Note to Physician**

There is no specific antidote. All treatment should be based on observed signs and symptoms of distress in the patient.

### SECTION 5. FIRE FIGHTING MEASURES

**Flash Point**

Not Applicable

**Fire and Explosion Hazards**

Product will burn under fire conditions.

**Suitable Extinguishing Media**

Recommended (small fires): dry chemical, carbon dioxide,
Recommended (large fire): foam, water spray.

**Fire Fighting Instructions**

Firefighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing. Keep unnecessary people away, isolate hazard area and deny entry. Evacuate residents who are downwind of fire. Persons who may have been exposed to contaminated smoke should be immediately examined by a physician and checked for symptoms of poisoning. The symptoms should not be mistaken for heat exhaustion or smoke inhalation.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

**General and Disposal**

Evacuation Procedures and Safety:

Wear appropriate protective gear for the situation. See Personal Protection information in Section 8.

Cleanup and Disposal of Spill:

Sweep up spilled granules, transfer to a marked container, and dispose of wastes on site or at an approved waste disposal facility.

**Land Spill or Leaks**

Containment of Spill:

Follow procedure described below under Cleanup and Disposal of Spill.

Environmental and Regulatory Reporting:

If spilled on the ground, the affected area should be scraped clean and placed in a appropriate container for disposal. Prevent material from entering public sewer...
### SECTION 7. HANDLING AND STORAGE

<table>
<thead>
<tr>
<th>Handling Procedures</th>
<th>Avoid direct or prolonged contact with skin and eyes. Avoid breathing dusts.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Storing Procedures</td>
<td>Do not contaminate water, food, or feed by storage or disposal.</td>
</tr>
<tr>
<td></td>
<td>Do not store in or around the home. Store unused product in original container only, out of reach of children and animals. NEVER TRANSFER THIS PRODUCT TO ANOTHER CONTAINER FOR STORAGE.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Work/Hygienic Procedures</th>
<th>Personal hygiene is an important work practice exposure control measure and the following general measures should be taken when working with or handling this material:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(1) Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.</td>
</tr>
<tr>
<td></td>
<td>(2) Wash hands and face carefully before eating, drinking, chewing gum, using tobacco, applying cosmetics, or using the toilet.</td>
</tr>
<tr>
<td></td>
<td>(3) Wash exposed skin promptly to remove accidental splashes of contact with this material.</td>
</tr>
<tr>
<td></td>
<td>(4) Remove clothing immediately if pesticide gets inside. Then wash body thoroughly and put on clean clothing.</td>
</tr>
<tr>
<td></td>
<td>(5) Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.</td>
</tr>
<tr>
<td></td>
<td>(6) Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.</td>
</tr>
<tr>
<td></td>
<td>(7) Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.</td>
</tr>
</tbody>
</table>

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls Where engineering controls are indicated by use conditions or a potential for excessive exposure exists, the following traditional exposure control techniques may be used to effectively minimize employee exposures: local exhaust ventilation at point of generation.

Eye/Face Protection Eye and face protection requirements will vary dependent upon work environment conditions and material handling practices. Appropriate ANSI Z87 approved equipment should be selected for the particular use intended for this material.

It is generally regarded as good practice to wear a minimum of safety glasses with side shields when working in industrial environments.

Body Protection Skin contact should be minimized through use of gloves and suitable long-sleeved clothing (i.e., shirts and pants). Consideration must be given both to durability as well as permeation resistance.

Respiratory Protection When respirators are required, select NIOSH/MSHA approved equipment based on actual or potential airborne concentrations and in accordance with the appropriate regulatory standards and/or industrial recommendations.

Under conditions immediately dangerous to life or health, or emergency conditions with unknown concentrations, use a full-face positive pressure air-supplied respirator equipped with an emergency escape air supply unit or use a self-contained breathing apparatus unit.

General Protection These recommendations provide general guidance for handling this product. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and piping systems for maintenance and repairs. Waste resulting from these procedures should be handled in accordance with Section 13: Disposal Considerations.

Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.

Applicators, mixers, loaders and persons cleaning application equipment must wear:
- Longsleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

When handlers use closed system or enclosed cabs, in a manner that meets the requirements listed in the Worker Protection Standard (WPS) or agricultural practices (40 CFR 170.240 (d) (4-6), the handler PPE requirement may be reduced or modified as specified in the WPS.
When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for applicators and other handlers, and such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

**AGRICULTURAL USE REQUIREMENTS**
Use this product in accordance with its labeling and with the Worker Protection, 40 CFR 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. The requirements only apply to sod-farm uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE requirement for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- coveralls
- waterproof gloves
- shoes plus socks

**NON AGRICULTURAL USE REQUIREMENTS**
These requirements apply to uses of this product that are not within the scope of the Worker Protection Standard (WPS) for agricultural pesticides (40CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

Always wear protective clothing and use appropriate equipment during application and handling. Avoid contact with granules. Avoid breathing dust.

**Exposure Limits**
None Established

Density                  1.79 g/ml
                        at 20 °C
Boiling Point            Not available
Melting/Freezing Point   Not available
Solubility (in water)    dispersible
Decomposition Temperature 240 °C

Other Information        Physical and Chemical properties here represent typical properties of this product. Contact the business area using the Product Information phone number in Section 1 for its exact specifications.

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability       This material is stable under normal handling and storage conditions described in Section 7.
Conditions to Avoid      direct sunlight
                        extreme heat
Incompatibility          strong bases
                        strong acids
                        strong oxidizing agents
Hazardous Products of Decomposition Decomposition Type: thermal
                        hydrogen chloride
                        hydrogen fluoride
                        oxides of nitrogen
                        oxides of sulfur
                        oxides of carbon
Hazardous
Polymerization
(Conditions to avoid)

Will Not Occur.

SECTION 11. TOXICOLOGICAL INFORMATION

Acute Oral Toxicity  Rat: 5,000 mg/kg
Acute Dermal Toxicity  Rabbit: 2,000 mg/kg
Acute Inhalation Toxicity  Acute Respiratory Irritation:
                           No test data available for this product.
Skin Irritation  Rabbit - Non irritating
                 Primary Irritation Index: 0
Eye Irritation  Rabbit - Mild irritant
Sensitization  Guinea pig - Not sensitizing.
Chronic Toxicity  The EPA has classified fipronil as a Category C carcinogen based on thyroid
tumors in rats only. These tumors are produced by a mechanism which is not
relevant to human cancer. Fipronil did not produce an increase in tumor
incidence in mice. Fipronil is not mutagenic or teratogenic.

Assessment Carcinogenicity
ACGIH  None
NTP  None
IARC  None
OSHA  None

SECTION 12. ECOLOGICAL INFORMATION

Environmental
Precautions  This pesticide is toxic to birds, fish, and aquatic invertebrates. Do not apply
directly to water or to areas where surface water is present or to intertidal areas
below the mean high water mark. Runoff from treated areas may be hazardous
to aquatic organisms in neighboring areas. Cover, incorporate or clean up
granules that are spilled. Do not contaminate water when disposing of equipment
washwater or rinsate. Do not apply within 15 feet of bodies of fresh water: lakes,
reservoirs, river, permanent streams, marshes, natural ponds, and commercial
fish ponds. A 15 feet buffer of uniform groundcover must exist between
application zone and bodies of freshwater (uniform ground cover is defined as
land which supports vegetation of greater than 2 inches throughout).
Do not apply within 60 feet of estuarine bodies of water. Estuarine water bodies are brackish, tidal water such as bays, mouths of rivers, salt marshes, and lagoons.

In order to reduce risk to birds, ensure that the application is spread evenly over the treatment area. In Florida, do not use this product within a one-mile radius of scrub oak habitat, which is home to the Florida scrub jay, the sand skink, and the blue tail mole skink.

Ecological Information

The following data is based on the technical grade active ingredient(s) (TGAI).

Mallard duck (Anas platyrhynchos).
LC50 - lethal concentration 50% of test species, > 5000 mg/kg/8 days
Dietary concentrations. Mean concentration.

Bobwhite quail (Colinus virginianus).
LC50 - lethal concentration 50% of test species, 48 mg/kg/8 days
Dietary concentrations. Mean concentration.

Daphnia magna
EC50 - effective concentration 50% of test species, 190 ug/l/48 hr
Mean concentration. Flow-through.

Bluegill sunfish (Lepomis macrochirus).
LC50 - lethal concentration 50% of test species, 85 ug/l/96 hr
Mean concentration. Flow-through.

Rainbow trout (Oncorhynchus mykiss).
LC50 - lethal concentration 50% of test species, 248 ug/l/96 hr
Mean concentration. Flow-through.
Environmental Fate

For chemical fate data call the product information phone number listed in Section 1.

SECTION 13. DISPOSAL CONSIDERATIONS

General Disposal Guidance

Pesticides wastes are acutely hazardous. Improper disposal of excess pesticide is a violation of Federal law.

Contamination with this product will render water, food or feed unfit for human or animal consumption. Wastes resulting from the use of this product may be disposed of onsite or at an approved waste disposal facility.

EPA Hazardous Waste - NO

Container Disposal

NEVER REUSE EMPTY CONTAINERS:

Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration or if allowed by State and local authorities, by open burning. If container is burned, stay out of smoke.
