STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store unused product in original container only in a cool, dry area out of the reach of children or animals.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND LIMITATION OF DAMAGES

CONDITIONS OF SALE: Sipcam Agro USA, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to Sipcam Agro USA, Inc. Sipcam Agro USA, Inc. DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, TO THE EXTENT ALLOWABLE BY LAW. Sipcam Agro USA, Inc. IS NOT LIABLE FOR CONSEQUENTIAL, INDIRECT, SPECIAL, OR INCIDENTAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND Sipcam Agro USA, Inc. IS SOLE LIABILITY AND BUYER AND USES EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE. BUYER AND USER ACKNOWLEDGE AND ASSURE ALL TRADES AND LIABILITY RESULTING FROM HANDLING, STORAGE, AND USE OF THIS PRODUCT. Sipcam Agro USA, Inc. DOES NOT AUTHORIZE ANY AGENT OR REPRESENTATIVE TO MAKE ANY OTHER WARRANTY, GUARANTEE OR REPRESENTATION CONCERNING THIS PRODUCT.

FIRST AID

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have affected person sip a glass of water if able to swallow.
• Do not induce vomiting unless told by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Emergency phone numbers:
(800) 424-9300 CHEMTREC (transportation and spills)
(800) 900-4044 Poison Control Center (human health)
(800) 345-4735 ASPCA (animal health)

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

AGRICULTURAL USE REQUIREMENTS (continued)

Do not water or water slowly in combination with the restricted entry interval (REI) of 12 hours. PPE required for early to treated areas that is permitted under the Worker Protection Standard and that involves contact with pesticide treated plants, such as soils, plants, or water, is:

- Coversalls
- Chemical-resistant gloves made from any waterproof material
- Shoes plus socks

GENERAL USE INFORMATION:

Apply EMINENT in water carrier by spearing onto crop surfaces that are intended to be protected from dis- ease. To obtain adequate coverage of typical agricultural crops, total spray volume usually will range from 20 to 150 gallons per acre (500 to 1200 liters per hectare) for dairy sprays, and 5 to 10 gallons per acre (20 to 40 liters per hectare) for concentrate ground sprays and aerial applications. Both ground and aerial meth- ods of application are recommended.

EMINENT should be added to the spray tank while filling with water. Keep the agitator running when filling the spray tank with pesticides, fertilizers, or sur- factants are not recommended unless prior use has shown the combination to be physically compatible, effective, and non-irritating under your conditions.

EMINENT contains a stannum demethylator inhibitor (stannum DMC) fungicide. EMINENT should be applied in mixtures or in alternate mixtures with non-DMC fungicides as a resistance management strategy. Do not mix or alternate EMINENT with other DMC fungicides.

AGRICULTURAL CROPS:

Crop Diseases Controlled Rate per Acre Pre-harvest Interval Application Directions

Sugarsbeets Cercospora leaf spot, primary mildew 13 fluid ounces 14 days Apply EMINENT at intervals of 21 to 28 days. When beginning conditions are favor- able for Cercospora leaf spot or powdery mildew. Applications of EMINENT must be alternated with a non-DMC fungicide which is registered for use on sugarsbeet. If the alternate fungicide is known to provide better control of target disease, EMINENT should no longer than 28 days apart, Do not make more than two (2) appli- cations of EMINENT per growing season. Crops other than sugarsbeet must not be grown within 120 days following the last application of EMINENT. Use of this product is limited to the states of Colorado, Michigan, Minnesota, Montana, Nebraska, North Dakota and Wyoming.

GENERAL CHEMIGATION INSTRUCTIONS:

Apply this product only through one or more of the following types of systems: sprinkler including center pivot, lateral move, and. tow, side (wheel) roll, trailer, big gun, solid set or hand moved irrigation system. Do not apply this product through any other type of irrigation system. Crop injury, lack of effectiveness or illegal pesticide residues in the crop can result from non-uniform distri- bution of treated water.

For specific information about calibration, contact State Extension Service specialists, equipment manufac- turers, or other irrigation experts.

Do not connect an irrigation system used for pesticide application to a public water system unless the pesti- cide label-prescribed safety devices for public water systems are in place.

A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise. Sprinkler Chemigation:

The system must contain functional check, vacuum relief valve, and line pressure drain appropriately located on the irrigation pipe to prevent water source contamination from backflow.

The pesticide injection pipe must contain a functional, automatic, quick-checking valve to prevent the injection pipe from being blown out.

The pesticide injection pipe must contain a functional, normally closed, solenoid-operated valve located downstream of the injection pump and connected to the system interlock to prevent fluid from being backflowed from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line should be properly designed and constructed of materials that are compatible with pesticides and capable of being lifted with a system interlock. Do not apply when wind speed favors drift beyond the area intended for treatment.

All chemigation equipment should be winterized. When mechanical agitation is operating and continues with filling with water. Stickers, spreaders, etc., should be washed out. If compatibility is in question, use the compatibility test bar test while mixing a whole tank. Because of the wide variety of possible combinations which can be encountered, observe all cautions and limitations on the label of all products used in mixtures.

EMINENT 125SL should be added through a traveling irrigation system continuously or at the last minutes of solid set or hand moved irrigation systems. Agitation is recommended.
AGRICULTURAL USE REQUIREMENTS

Do not water or walk on treated areas for at least the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

• Coveralls
• Chemical-resistant gloves made from any waterproof material
• Shoes plus socks

GENERAL USE INFORMATION:

Apply EMINENT in water carrier by spraying onto crop surfaces that are intended to be protected from disease. To obtain adequate coverage of typical agricultural crops, total spray volume usually will range from 20 to 150 gallons per acre (000 to 1400 liters per hectare) for driftable sprays, and 5 to 10 gallons per acre (20 to 40 liters per hectare) for concentrate ground sprays and aircraft applications. Both ground and aircraft methods of application are recommended.

EMINENT should be added to the spray tank while filling with water. Keep the agitator running when filling the spray tank. For ground applications, it is best to wash the outside of gloves before removing, as soon as possible, wash thoroughly and change into clean clothing.

EMINENT should be added through a traveling irrigation system continuously or at the last 30 minutes of application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Users should:

• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Wash any exposed skin areas thoroughly before leaving the treated area.
• Wash contaminated clothing before reuse.
• Wash hands after removing PPE and before eating, drinking, chewing gum, using tobacco, or using the toilet.

EMINENT CONTAINS A STEM DETHRMYLIATION INHIBITOR (STAIN DMF) fungicide. EMINENT should be applied in mixtures or in alternative applications with non-stain DMF fungicides as a resistance management strategy. Do not mix or alternate EMINENT with other DMF fungicides.

EMINENT 125SL

Applying EMINENT in a water carrier by sprinkling onto crop surfaces that are intended to be protected from disease. To ensure adequate coverage of typical agricultural crops, total spray volume usually will range from 20 to 150 gallons per acre (000 to 1400 liters per hectare) for driftable sprays, and 5 to 10 gallons per acre (20 to 40 liters per hectare) for concentrate ground sprays and aircraft applications. Both ground and aircraft methods of application are recommended.

EMINENT should be added to the spray tank while filling with water. Keep the agitator running when filling the spray tank. For ground applications, it is best to wash the outside of gloves before removing, as soon as possible, wash thoroughly and change into clean clothing.

EMINENT should be added through a traveling irrigation system continuously or at the last 30 minutes of application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Users should:

• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Wash any exposed skin areas thoroughly before leaving the treated area.
• Wash contaminated clothing before reuse.
• Wash hands after removing PPE and before eating, drinking, chewing gum, using tobacco, or using the toilet.

EMINENT CONTAINS A STEM DETHRMYLIATION INHIBITOR (STAIN DMF) fungicide. EMINENT should be applied in mixtures or in alternative applications with non-stain DMF fungicides as a resistance management strategy. Do not mix or alternate EMINENT with other DMF fungicides.

Agricultural Crops:

**Sugarbeets**

- Ceratocystis ipomoeae, primary midvein
- 13 fluid ounces
- 14 days

**Agricultural Use Requirements (continued)**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Caution if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing.

**PERSONAL PROTECTIVE EQUIPMENT (PPE):**

- Long-sleeved shirt and long pants
- Shoes plus socks
- Chemical-resistant gloves made from any waterproof material
- Follow manufacturer's instructions for storing/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

**ENVIRONMENTAL HAZARDS:**

This product may be toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface or ground water may be present, or to intertidal areas between the mean high-water mark. Do not apply when wind speed favors drift beyond the area intended for treatment. Do not apply to watercourses or to areas where water is to be used for aquatic purposes or irrigation of treated areas. Do not apply this product in a manner that is intended to protect from disease that is not intended to be protected from disease. Do not apply this product in a manner that is intended to protect from disease that is not intended to be protected from disease.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store unused product in original container only in a cool, dry area out of the reach of children or animals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

WARRANTY AND LIMITATION OF DAMAGES
CONDITIONS OF SALE: Sipcam Agro USA, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to Sipcam Agro USA, Inc. Sipcam Agro USA, Inc. DISCLAIMS ALL OTHER WARRANTIES EXPRESS OR IMPLIED, TO THE EXTENT PERMITTED BY LAW.

EXCLUDED DAMAGES: Sipcam Agro USA, Inc. does not authorize any agent or representative to make any other warranty, guarantee or representation concerning this product.

SIPCAM AGRO USA, INC. DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.moilcon COMPANY SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, AND SIPCAM AGRO USA, INC. DISCLAIMS ALL LIABILITY AND REMEDIES RESULTING FROM HANDLING, STORAGE, AND USE OF THIS PRODUCT. SIPCAM AGRO USA, INC. DOES NOT AUTHORIZE ANY AGENT OR REPRESENTATIVE TO MAKE ANY OTHER WARRANTY, GUARANTEE OR REPRESENTATION CONCERNING THIS PRODUCT.

FIRST AID
IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Have affected person sip a glass of water if able to swallow.
• Do not induce vomiting unless told by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
